

Border Print (Fabric 10) Cutting Guide

After reserving the wide stripes required for the quilt borders, there will be two stripes measuring 60" and four stripes measuring 85".

Refer to these diagrams (and the individual block patterns) to position the templates for fussy cutting patches for the blocks. These layouts are the most efficient way to cut the patches from the stripes and will ensure that there are sufficient repeats of the designs needed for each patch. Four patches are cut from most templates; eight patches are cut using Templates Y, GG, JJ, KK and NN.

Each image of the wide stripe represent a total length of approximately 32"; the design repeats every 8".

Patches cut from Templates NN, GG, Q, F, M and Y are cut from one set of stripes.

Patches cut from Templates B, JJ, KK, K, Kr and I are cut from one set of stripes.
